

PROFILE

Hello! I'm a skilled developer with expertise in Android and web development. In Android, I excel in using Android Studio, Kotlin, and Firebase services like Firebase Authentication and Room Database to build secure and feature-rich mobile apps. On the web development front, I specialize in HTML, CSS, JavaScript, and PHP to create visually appealing and interactive websites. My programming proficiency extends to C, C++, and other languages, giving me a versatile edge. With strong problem-solving skills, effective communication, and experience in various development tools, I'm well-equipped to take on challenging projects in both mobile and web development domains.
